Precision Cooker WI-FI

The Anova Precision Cooker WI-FI is the first ever smart sous vide device to hit the market. Delivering on the promise of the smart kitchen, the Precision Cooker WI-FI allows anyone to get professional quality results every time, from anywhere. With a brand new WI-FI app, users can start, stop, and monitor their cook while away from their kitchen, giving them more time to focus on the things they love.

Precision cooking uses precision temperature control, which lends itself especially well to remote cooking. This technique is about bringing food to a very precise temperature and holding it there for a period of time. The circulation of water ensures food is cooked perfectly edge to edge with a consistent temperature throughout. Users can be confident that food won't overcook, allowing for flexibility and freedom in their schedules. Simply attach the Precision Cooker WI-FI to any pot, add water, drop in desired food in a sealed bag or glass jar and press start. The Anova WI-FI App will send a notification when food is ready, and keep it warm until it's time to eat. Come home to the best meal ever.

Features

- WI-FI + Bluetooth connectivity
- New Anova WI-FI App to control device remotely
- Push notifications on cook status
- 360° directional pump for maximum circulation
- LED interface that can toggle between F/C
