Our Story

Anova was started by 3 founders who were passionate about science and cooking and wanted to help everyone cook like a pro. In 2013, Anova launched the first version of its immersion circulator, the Anova One, as one of the first immersion circulators available at a consumer-friendly price point. The following year, Anova launched one of the most funded food campaigns on Kickstarter, raising more than \$1.8 million dollars to develop the first connected immersion circulator, the Anova Precision® Cooker. In 2016, Anova extended its Anova Precision® Cooker line with the launch of Wi-Fi and Bluetooth enabled sous vide devices. Anova was acquired by Electrolux in 2017 and today is the world's leading provider of smart kitchen appliances.
